"Fourth Industrial Revolution: Issues and Implications"

ABOUT CBFS

The College of Banking and Financial Studies (CBFS) is an apex government organisation for educating, training and conducting research in the banking and financial services sector in Oman. It was established in 1983 by a Royal Decree. CBFS operates under the supervision of the Central Bank of Oman and is supported by the commercial banks operating in the Sultanate of Oman. CBFS is the first Government College in Oman got accredited by Oman Academic Accreditation Authority. Over the past 35 years, CBFS growth has been supported by various Royal decrees that have enabled the College to diversify and broaden the services provided for the banking and finance industry. CBFS offers a broad range of Diploma, Bachelor's and Master's programmes, in areas related to Business Administration, Accounting, Auditing, Finance and Banking, in partnership with Strathclyde Business School and the University of Bradford. Driven by the desire to cater for local needs, CBFS launched its own Bachelor's degree programmes in 2014-15. CBFS provides professional certifications and conducts customized and open training courses in banking and finance related areas. CBFS has developed a research culture at the College, supports applied research and encourages consultancy activities. CBFS contributes to the national economy and provides support in building sustainable capacity within the community.

ABOUT FOURTH INDUSTRIAL REVOLUTION

According to Schwab (2015), the First Industrial Revolution used water and steam power to mechanize production. The Second used electric power to create mass production. The Third used electronics and information technology to automate production. The founder and executive chairman of the World Economic Forum Prof. Klaus Schwab has coined the idea of Fourth Industrial Revolution which will be driven largely by the convergence of digital, biological, and physical innovations. The Fourth Industrial Revolution's technologies, such as artificial intelligence, genome editing, augmented reality, robotics, and 3-D printing, are rapidly changing

the way humans create, exchange, and distribute value. It is important to appreciate that the Fourth Industrial Revolution involves a systemic change across many sectors and aspects of human life. We are moving from automated production and IT, to an automated society. This revolution is expected to impact all disciplines, industries, and economies.

Page | 2 In this backdrop, we need to have a sound understanding fourth industrial revolution and its economic, environmental and social impact and transforming strategies due to technological revolutions for survival and sustainability. This book seeks to bring together contributions in the form of chapters from leading researchers, academics and practitioners to provide useful input to develop future plans and strategies for meeting the challenges of the Fourth Industrial Revolution.
